ersiegel5@wisc.edu · LinkedIn

Interested in product management.

Work

Infineon Technologies, Project Management Co-op

January–April 2027

Infineon is a semiconductor manufacturing company.

- Upcoming co-op in project management, focused on AI agents.

Gallop Intelligence, Engineering and Certification Intern

May–August 2026

Gallop builds AI solutions that replace legacy enterprise IT systems for Fortune 500 companies.

- Shipped React and TypeScript features, and benchmarked AI features.
- Led ISO 27001 and SOC 2 certification.
- Created the process for engineering recruiting.

Germ Network, Engineering Intern

May–August 2025

Germ is a leading encrypted private messenger app.

- Developed an in-app LLM security feature, from concept through design, testing and launch.
- Used statistical analysis and user research to support growth and adoption.

TrustLab, AI Intern

June–July 2023

TrustLab detects and mitigates online safety and security threats.

- Tested and analyzed AI system responses for reliability, safety and quality.
- Built an API integration for third-party services.

TU Dresden, Research Assistant

July 2023

School of Engineering, Drying and Micro-Process Engineering Labs.

- Researched ion chromatography to analyze biofuels.

Education

University of Wisconsin–Madison

Since August 2024

Junior, Bachelor's in Computer Engineering

Coursework in Circuit Analysis, Electrodynamics, and Signals and Computation

DIS Copenhagen

August–December 2026

Study abroad, computer engineering coursework

Palo Alto High School

Graduated 2024

High school diploma, 4.0 GPA

Skills

Proficient

Verilog, MATLAB, GitHub Actions, shipping production code through PRs and CI/CD

Knowledge of

Java, Python, and AI coding tools (Cursor, Copilot, Claude Code)

Languages

German and English, bilingual. Dual citizen.

Interests

AI-assisted coding and app security

Private pilot, FAA certified since February 2024

Chess and soccer
